LIBRARY MANAGEMENT SYSTEM

Technologies Used:Java, JDBC, Servlets, HTML, CSS, MYSQL.Description:Developed a dynamic Library Management System as a web-based application using Java Servlets and JDBC for backend operations. Thesystem provides functionalities for user signup and login, and supports full CRUD (Create, Read, Update, Delete) operations for managingbooks and user records. Ensured efficient interaction with the database using JDBC and implemented robust servlet logic to handle usersessions and data flow. Designed a simple front-end interface using HTML and CSS for seamless user interaction.

2 Days

HR Task Management System

Technologies Used:Java, JSP, Hibernate, HTML, CSS, MySQL.Description:Built a web-based HR Task Management System using JSP for the presentation layer and Hibernate ORM for seamless databaseinteraction. The application includes user authentication (signup and login) and supports complete CRUD operations to manage employeetasks. The system enables HR personnel to assign, update, and track tasks efficiently. Used Hibernate to map Java objects to databasetables and manage persistence, reducing boilerplate JDBC code and enhancing maintainability.
